

## ASSIGNMENTS IN MINERAL RESOURCE ESTIMATION

Micon International provides mineral resource estimation services to the mineral industry world-wide. Experienced geologists and geostatisticians are available through our Canadian and United Kingdom offices. Micon has experience in the preparation of initial resource estimates and mineral resource models in preparation for feasibility studies and is fully conversant with the mineral resource and reserve reporting codes used internationally (CIM Definitions, JORC Code and others). Micon's staff has the knowledge base for estimation of resources for base, precious and ferrous metal deposits as well as for industrial and energy minerals.

**Aker Solutions, Nezhdaninskoye Property, Russia:** Preparation of a mineral resource block model in support of a prefeasibility study prepared by Aker Solutions for the Nezhdaninskoye gold project, Yakutia.

**Andean Resources Limited, Cerro Negro Project, Argentina:** Preparation of initial and updated mineral resource estimates for the Cerro Negro gold project, Santa Cruz Province.

**Aquiline Resources Inc., Calcatreu Project, Argentina:** Preparation of a first time mineral resource estimate for the Calcatreu gold-silver project, Rio Negro Province. The initial estimate was followed by an update for a preliminary assessment and economic evaluation of the project.

**Aurelian Resources Inc., Bonza las Peñas Deposit, Ecuador:** Preparation of a first time mineral resource estimate for a complex, polyphase, intermediate to low sulphidation epithermal gold-silver project in southeast Ecuador.

**Aurelian Resources Inc., Fruta del Norte Deposit, Ecuador:** Preparation of the initial mineral resource estimate for the Fruta del Norte intermediate to low sulphidation epithermal gold-silver deposit.

**Avalon Ventures, Separation Rapids Rare Metals Project, Canada:** Preparation of a mineral resource estimate for a prefeasibility study for the Big Whopper rare-metal pegmatite deposit. The proposed products of mining and processing were concentrates of petalite (lithium/aluminum silicate), rubidium-rich potassium feldspar, sodium feldspar and spodumene.

**Bactech Enviromet Corporation, Tonkin Springs Deposit, United States:** A mineral resource estimate was prepared for first time disclosure of NI 43-101 compliant mineral resources at a former producing Battle Mountain Trend gold deposit, Nevada.

## ASSIGNMENTS IN MINERAL RESOURCE ESTIMATION

**Cuervo Resources Inc., Cerro Ccopane-Oropura Property, Peru:** Preparation of an updated mineral resource estimate for the Cerro Ccopane-Oropura skarn-hosted iron deposit.

**ECU Silver Mining Inc., San Diego Project, Mexico:** Preparation of a mineral resource estimate for the San Diego silver-lead-zinc-gold project, Durango.

**Eldorado Gold Corporation, Efemçukuru Project, Turkey:** Preparation of a first time mineral resource estimate for an epithermal vein hosted gold deposit.

**Eldorado Gold Corporation, Kisladag Project, Turkey:** Preparation of a first time mineral resource estimate for a high-level porphyry gold system hosted in a Pliocene-age andesitic volcanic complex. The assignment was followed by several mineral resource updates, the final one for a bankable feasibility study.

**Fortune Minerals Inc., NICO Deposit, Canada:** Preparation of a mineral resource estimate for a bankable feasibility study on a polymetallic cobalt-bismuth-gold IOCG style (iron oxide hosted copper gold) deposit, Northwest Territories.

**Guyana Goldfields Inc., Aurora Project, Guyana:** Initial and updated resource estimates were prepared for the Aleck Hill, Rory's Knoll, Walcott Hill and Mad Kiss zones at the Aurora gold project.

**High River Gold Mines Ltd., Prognoz Project, Russia:** Preparation of a mineral resource estimate for the Prognoz silver project, Yakutia.

**High River Gold Mines Ltd., JSC Buryatzoloto, Russia:** Preparation of a mineral resource estimate in support of a feasibility study, both Russian (GKZ compliant) and western versions, for the Berezitovoye gold project, Amur region of Russia.

**Inter-Citic Minerals Inc., Dachang Project, China:** Estimation of a mineral resource for the Dachang gold project, western China, in conjunction with the preparation of a preliminary economic assessment.

**International Minerals Corporation, Inmaculada Project, Peru:** Preparation of an independent mineral resource estimate for the Angela Vein, a low sulphidation epithermal gold-silver deposit.

**Largo Resources Ltd., Macuchi Project, Ecuador:** In conjunction with Largo staff completion of a preliminary mineral resource estimate for several former producing copper-gold VMS style deposits on the Macuchi property.

**North Atlantic Resources, Storliden Project, Sweden:** Preparation of a mineral resource estimate for a prefeasibility study on the Storliden VMS deposit located in northern Sweden, on behalf of the owner.

## ASSIGNMENTS IN MINERAL RESOURCE ESTIMATION

**Osisko Mining Corp., Canadian Malartic Project, Canada:** Preparation of an independent, updated mineral resource estimate for the Canadian Malartic gold project, Malartic, Quebec, for use in a feasibility study.

**Platexco, Winnaarshoek PGM Project, South Africa:** Preparation of a mineral resource estimate for a prefeasibility study for a new platinum group metals mine and plant in the eastern Bushveld Igneous Complex, Republic of South Africa.

**OJSC Polyus Gold, Natalka Project, Russia:** Preparation of an updated mineral resource model and resource estimate for the Natalka gold property in Magadan.

**Riddarhyttan Resources AB, Suurikuusikko Gold Project, Finland:** Preparation of a mineral resource estimate on a mesothermal gold deposit in northern Finland for a bankable feasibility study completed on behalf of the owner.

**Saudi Company for Precious Metals, Bulghah Gold Project, Saudi Arabia:** A mineral resource estimate for a bankable feasibility study was completed by Micon for the Bulghah gold project in Saudi Arabia.

**Southern Star Resources Inc., Western Discovery Zone, Gold Eagle Joint Venture, Ontario:** A preliminary mineral resource estimate was prepared for an Archean mesothermal gold vein system adjacent to the Gold Eagle and MacKenzie Red Lake mines.

**URSA Major Minerals Inc., Shakespeare Deposit, Ontario:** A first time mineral resource estimate was prepared for a magmatic nickel, copper, cobalt, PGE and gold deposit, followed by an updated estimate for a bankable feasibility study.

**United States Department of Justice, Alaska Project, USA:** A mineral resource estimate of placer gold deposits on three claim groups was prepared as part of a property valuation assignment in support of litigation.

**Young-Davidson Mines Ltd., Matachewan Gold Project, Matachewan, Ontario:** A resource estimate was prepared for first time disclosure of NI 43-101 compliant mineral resources in a syenite-associated mesothermal gold deposit at the former producing Young-Davidson and Matachewan Consolidated mines.

**Yamana Resources Inc., Bacon Deposit, Argentina:** A preliminary mineral resource estimate for a bonanza-grade, low-sulphidation, epithermal silver-gold deposit.

**Yamana Resources Inc., Jacobina Property, Brazil:** Preparation of a mineral resource block model for the Jacobina mine, Bahia State.
