Capabilities

Mineral Economics and Market Analysis
Market analyses are conducted to provide reasoned price forecasts for cash flow evaluation of mineral properties. Valuations of mineral properties and/or mining companies are provided for the independent determination of fair market value in support of corporate transactions or litigation.

Project cash flow projections are made at all levels of engineering study to determine potential economic viability.

Mineral Property Valuation
Market analyses are conducted to provide reasoned price forecasts for cash flow evaluation of mineral properties. Valuations of mineral properties and/or mining companies are provided for the independent determination of fair market value in support of corporate transactions or litigation.

Mining Engineering
Micon can assist mining companies at all stages of mineral property development from early-stage exploration, drilling and sampling, resource estimation, and technical studies, through financing and asset management and the use of state-of-the-art technical solutions to the development of robust plans and schedules.

Auditable mine plans, schedules, and cost estimates at all levels of technical study from PEA to operation.

Where appropriate, the results of these studies are provided in the form of Technical Reports suitable for public disclosure under Canadian National Instrument 43-101 or as Competent Person’s Reports.

Due Diligence Review and Audit
Micon has accumulated many years of experience in the preparation and review of mineral property Technical Reports and due diligence reports.
